

Remini App Store Ratings Review

We fetched **9,812 reviews** from the App Store across 32 countries and classified each one: does it contain an actual ask, and if so, what for. The 285 that did were then read individually (not just keyword-matched) and sorted into nine groups.

CLASSIFICATION RESULTS

9,812 App Store reviews, split by whether the review contained a feature request

CATEGORY	REVIEWS	% OF TOTAL
<i>No feature request (praise, complaint, bug report, too short, or unsupported language)</i>	<i>9,527</i>	<i>97.10%</i>
Had a feature request	285	2.90%

Of the 285 reviews that did contain a feature request · % of that 285 · a review can carry more than one group

GROUP	REVIEWS	% OF REQUESTS
Pricing / subscription	105	36.8%
Fixes to existing features (image quality, enhancements, stability)	160	56.1%
Ads	62	21.8%
Not a real ask (praise or too vague, despite the phrasing)	10	3.5%
● Multi-person features	7	2.5%
Other new-feature asks (filters, data privacy)	3	1.1%

CONCLUSION

Only 285 of 9,812 reviews (2.9%) asked for a product change. Most were about **pricing** (36.8%) or **fixing what already exists** (56.1%). Genuinely **new**-feature asks were rare — 10 reviews, 3.5% — but **70%** of those were about ● **adding multiple people**: couples, groups, family. Source reviews in the addendum.

Source: reviews_output.json · the 285 requests were each read and grouped individually (not keyword-matched) · groups are independent (a review matching two is counted in both)

Source reviews — multiple people, couples & family

The 7 reviews behind the multi-person finding above — each one an explicit ask (fix it, bring it back, add more of it), not just a review that happens to mention more than one person. Reproduced exactly as submitted — original language, no translation, no edits.

I've had the paid pro version I tried to add my sister to edit some of both of us and it refuses to let me have more than one person to edit when it says you can have up to 4 I've tried for days to work it out. Unsubscribed now!

Remini is een leuke app, alleen vindt ik jammer dat je niet veel kan kiezen. Vooral met hoofddoek en koppel foto's is er weinig keuze. Hopelijk komt er nog meer bij.

高画質機能が富い性能良く感じます！画質によってはイ 上がりが悪くなっちゃうけど。正確性があるってよく使わせてもらっています！
前にあったキス機能がめっちゃ面白かったです！短期間でも良いのでまた復活してて欲しいです！

I love this app so much up it does the job enhance photo perfectly.
The new updated are not so great. As I tried to enhance a group shot photo but, it does only one person Cleary but blurry the others face instead. Please fix this issue and I will give 5 stars.
